Lecture notes of ENT
Essentials of ENT

	Topics
1	Focused ENT History and Physical examination
2	Anatomy of the ear
3	Hearing assessment (Tuning fork tests/ PTA/ Tympanogram) and hearing aids.
4	External ear diseases (Otitis externa, Wax impaction, Congenital abnormalities)
5	Otitis media with effusion, Acute otitis media
6	Chronic suppurative otitis media with and without cholesteatoma, Mastoiditis
7	Otosclerosis
8	Sensory neural Hearing loss (SNHL) and Tinnitus
9	Vestibular system anatomy and Vertigo (BPPV/ Endolymphatic hydrops/ Labyrinthitis/ Vestibular neuritis)
10	Anatomy of the pharynx
11	Adenotonsillar diseases and Obstructive sleep apnea
12	Anatomy of the nose
13	Nasal obstruction and anosmia
14	Acute rhinosinusitis
15	Chronic rhinosinusitis with and without polyposis
16	Anatomy of the larynx
17	Laryngeal diseases and hoarseness of the voice
18	Neck masses
19	Head and neck tumors
20	ENT Emergency (Tracheostomy/ Epistaxis/ Foreign body aspiration)
