

مخرجات برنامج بكالوريوس الرياضيات

PILO1	Able to define the principles and concepts of different mathematical sciences.
PILO2	Able to remember general basics and concepts in physics, chemistry, computer skills, and other general sciences.
PILO3	Able to continue to acquire and identify mathematical and statistical knowledge and skills appropriate to professional practices.
PILO4	Able to present mathematical arguments and proofs and apply the unified basic structures of mathematics.
PILO5	Able to develop and interpret critical thinking skills in solving problems that can be represented mathematically.
PILO6	Able to employ the acquired mathematical concepts and skills in solving problems in all branches of sciences.
PILO7	Able to communicate and convey mathematical ideas, both orally and in writing.
PILO8	Able to quickly access information through digital libraries.
PILO9	Able to analyze and critically interpret digital data and graphs manually or through appropriate programs.
PILO10	Able to work individually or in a team and take responsibility in different situations.
PILO11	Able to achieve ethical rules in his behavior.
PILO12	Capable of self-development and continuous to keep pace with the rapid and continuous scientific progress in the field of mathematical sciences.
