

مخرجات برنامج بكالوريوس تحاليل طبية

PILO1	knowledge of safety, bio-risk management, and critical laboratory values
PILO2	knowledge in the areas of clinical chemistry, body structure and function, and molecular biology techniques
PILO3	Knowledge in the areas of hematology, blood banking, serology, immunology, transfusion medicine.
PILO4	Knowledge of microbiology, Histopathology, urine examination, and stool examination.
PILO5	skills in reception, proper handling of specimens, and basic laboratory skills
PILO6	Technical skills in the areas of microbiology, clinical chemistry, Hematology, blood banking, serology, immunology, transfusion medicine, body fluid analysis, Histopathology and molecular biology techniques.
PILO7	Communications sufficient to serve the needs of patients, the public and members of the health care team
PILO8	Use knowledge and technology in Microbiology, Immunology, Clinical Chemistry, Hematology and Molecular Biology, to implement various types of diagnostics in the Clinical Laboratories.
PILO9	Think critically, interpret and analyze results, and solve problems in the Clinical Laboratories.
PILO10	Utilize ethical responsibility to preserve patient confidentiality and privacy and ensure accurate and ethical patient data transfer.
