

#### **BAU's Commitment to Providing Access to Physical Healthcare Services**

Al-Balqa Applied University (BAU) acknowledges comprehensive health care as an essential basis for maintaining student and staff well-being since it supports both academic achievement and workplace productivity. The strategic vision of BAU includes providing physical healthcare services at each campus for students, faculty members and staff. The healthcare services work together with educational activities to create programs about disease prevention and educate students about healthy lifestyles. The healthcare facilities located on campus provide medical consultations for general health along with emergency services, first aid assistance, and scheduled health evaluation procedures. The medical facilities under trained supervision operate during working hours to provide prompt healthcare services for all who belong to the university community. BAU demonstrates a firm dedication to delivering accessible physical healthcare services that support the United Nations Sustainable Development Goals. The health and safety of students and faculty members and the people who live near the university achieve SDG 3 (Good Health and Well-being) since the university provides prevention programs alongside prompt medical help. Health awareness campaigns along with training sessions adopted by the university curriculum help advance SDG 4 (Quality Education) through the development of health literacy. The university leads SDG 10 (Reduced Inequalities) through its practice of providing balanced healthcare services throughout all its facilities while actively working with vulnerable populations. The university strengthens its health initiatives through its partnerships with national health organizations together with civil society organizations according to SDG 17 (Partnerships for the Goals).

The health services at BAU are strengthened through health awareness campaigns vaccination drives and public health seminars delivered in partnership with health institutions like the Ministry of Health and governmental hospitals. The academic programs at BAU deliver educational content about chronic disease prevention alongside hygiene knowledge as well as nutrition instruction reproductive health education and seasonal illness understanding especially regarding influenza. As part of its civic service approach BAU provides free and mobile health care options to the wider

community while conducting medical outreach days along with free health screenings and mobile clinic activities.

#### Health Infrastructure Supporting Student and Staff Wellbeing at BAU

The Al-Balqa Applied University (BAU) devotes itself to promoting the wellness of both students along academic employees as well as management personnel within its entire community. Health centers operate at each campus of the university featuring trained medical staff who deliver first aid as well as primary health services and specialized referrals. The healthcare facilities maintain regular operational hours during the entire academic week to provide primary and emergency healthcare services combined with educational sessions about healthcare and wellness. The health units at BAU establish partnerships between the Ministry of Health and local hospitals through which they offer high-quality care combined with health security services for every university member. The services offered create a secure learning environment that supports BAU's dedication to both sustainable development and healthcare.

Multiple sustainable development goals find direct alignment in the health facilities of Al-Balqa Applied University. The facilities at Al-Balqa Applied University predominantly support SDG 3 by delivering healthcare services that maintain accessible prevention alongside responsive treatment for all academic community members. BAU advances health through its training facilities alongside wellness programs and its ties to health institutions throughout the city. A supportive campus environment created by these initiatives helps students achieve quality education without health-related disturbances in line with SDG 4. SDG 10 Reduced Inequalities is supported through equal healthcare provision that extends to all backgrounds and statuses, and SDG 8 is demonstrated through university work environment wellness integration because employee well-being directly influences institutional success and work productivity.

The following is a sample of BAU's health infrastructure that supports the well-being of students, academic staff, and administrative employees

#### **Improving Health Service Access:**

BAU dedicates itself to community wellness via its continuous release of an updated Medical Network Platform. The platform provides detailed information about healthcare providers who have medical accreditation at different locations across Jordanian governorates to help students and staff receive quality healthcare. Users can explore the platform to find medical centers as well as hospitals and clinics in proximity. BAU uses its electronic portal to provide students and staff with a user-friendly process to submit medical service feedback or complaints that enhance both continuous improvement and user satisfaction at the university.

#### **BAU's Community Health Outreach and Engagement Activity**

BAU stands as an institution that maintains dedicated efforts to public health and community outreach by conducting numerous medical outreach programs to benefit vulnerable and marginalized groups in society. Al-Zarqa Faculty brings forth collective effort within both Al-Sukhna Refugee Camp free medical days and the "Healthy Lifestyles" campaign project. Free medical days are a common occurrence at the university and involve partnerships with charitable organizations including the King Abdullah II bin Al-Hussein Orphanage in Salt to provide essential medical services combined with health education for children and their families.

Through school outreach, the Department of Nursing delivers health education outside of the university environment while teaching students about nutrition hygiene practices disease prevention, and mental health education. The "Drop of Life" campaign works in parallel with other initiatives to establish blood donation as a cultural practice that develops social responsibility and defends vital life-saving methods throughout the community. The outreach programs support SDG 3 (Good Health and Well-being), SDG4 (Quality Education), and SDG 10 (Reduced Inequalities) through their mission to provide universal healthcare knowledge to marginalized groups. Sustainability along with social impact emerges naturally from BAU's combined academic-community engagement strategies that unite student activities and healthcare education objectives.

The following are selected samples of BAU's health outreach initiatives that reflect its commitment to community well-being and public health education:

#### **BAU Shared Sports Facilities and Community Engagement**

The Al-Balqa Applied University pursues active life promotion through open sports facilities for its academic members alongside citizens in the community. The university enables inclusive access to infrastructure through coordinated events and structured agreements that promote youth engagement as well as physical well-being for the university community and the surrounding public. A specialized department leads the coordination of athletic processes by uniting with local organizations and both university-affiliated schools and clubs. The university supports joint development projects that establish new sports facilities to benefit educational and social community needs. By supporting physical health through favorable environments BAU is committed to achieving SDG 3 (Good Health and Well-being) as well as SDG 4 (Quality Education) through complete student development and SDG 8 (Decent Work and Economic Growth) through community collaboration and facility improvements which lead to SDG 10 (Reduced Inequalities) through inclusive access to recreation.

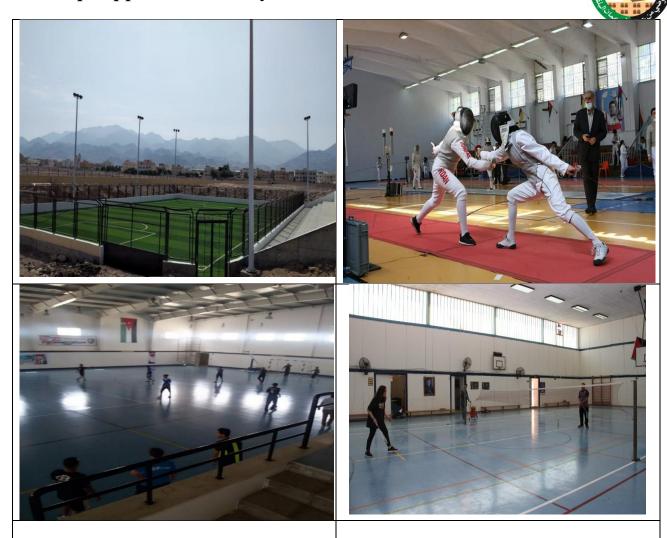

The following represents BAU sports infrastructure and a sample of community engagement activity which reflects BAU's ongoing commitment to supporting community well-being through the provision and sharing of its students, staff, and the local community.
